

AGENTE DE CAMBIO

ACCIONA contribuye a fomentar conciencia social entre las administraciones, la sociedad y las empresas hacia un modelo económico sostenible y bajo en carbono.

“At ACCIONA, we’ve identified carbón pricing as a outstanding tool to boost decarbonization and support the transition to a zero-carbon economy.”

JOSE MANUEL ENTRECANALES
DOMECQ, CEO ACCIONA

“The Task Force of Climate-Related Financial Disclosure, TCFD, represents a step beyond in the essential progress through the inclusion and monetization of the affections of climate change into our current and future investments. These recommendations, being also pushed by financial leaders, will be a strong support in ACCIONA’s pathway towards the implementation of ambitious, effective and incremental targets for enabling the transition to a low carbon economy.”

José Manuel Entrecanales Domecq,
Chairman and Chief Executive Officer, ACCIONA

ACCIONA

A common framework should reflect, at least: binding targets on Member States; indicative paths to achieve final targets; transparent, stable and predictable support systems and market rules; prohibition of retroactivity or other measures against achieving renewable targets; coherence with fiscal policy (environmental taxes); a specific procedure enabling the Commission to verify in advance the effective implementation of the methodology, as well as to resolve potential deviations from the national targets; discrimination against conventional energies (remove fossil fuel subsidies).

Carbon Pricing Corridors can be used by companies, investors and policymakers to help manage climate risk and to actively shift investments to the growing clean economy – ACCIONA will be including them in our own business planning going forward.

José Manuel Entrecanales Domecq
ACCIONA's Chairman & CEO
